

As a new XM subscriber, I find the instant traffic and weather information increases my safety and awareness of possible inclement weather or storms. I commute approximately 130 miles to my office everyday. As a female, this makes me feel much safer and helps me to avoid delays in my travel time. I also live in what is known as tornado alley where bad weather can come up on you very fast. This could easily save lives when more people subscribe and have the ability check the weather and traffic continuously. Please continue to allow this broadcasting. Thank you for your time and attention to this issue. This is a fabulous use of our new technology.
